

# THE OTTERY FLY FISHING CLUB WATERS 2021

**Fishing on right, left or both banks as shown highlighted in RED.**

## A new way to find each of our beats

Using the: What3Words mobile phone app

If you have a mobile phone you can download this free app and use it to pinpoint your position anywhere in the world using just three words separated by full-stops. For example the geoneedle on the top of Orcombe Point in Exmouth is at: **perky.mute.mint**

It is recommended by virtually all the emergency services for indicating precisely where you are - down to a 3 metre square (approx. 10 sq. ft)! Indispensable if you need help and want someone to find you when you are miles from anywhere, for example when you are fishing.

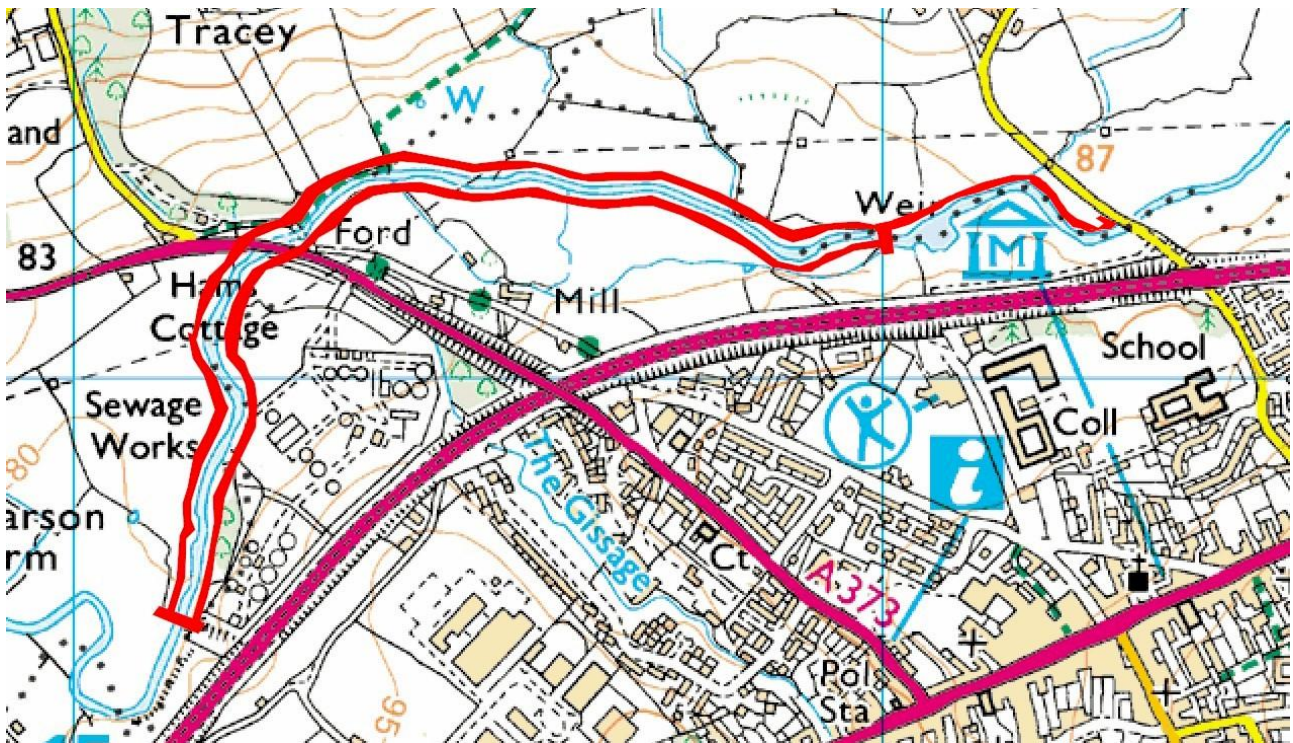

**This year I have experimented with this new app by including, above the map for each of our beats, the 'What3Words' addresses for each end of the beat. I hope this will be of particular use to new members and guests who may not be familiar with the area or our fishing waters.**

Being familiar with the 'What3Words' new way of specifying a location may even save your life! Try it!

Tips: The What3Words app includes a useful, very short tutorial. I like to use satellite images and you can display these by clicking on the 'world button' at the bottom right of the screen.

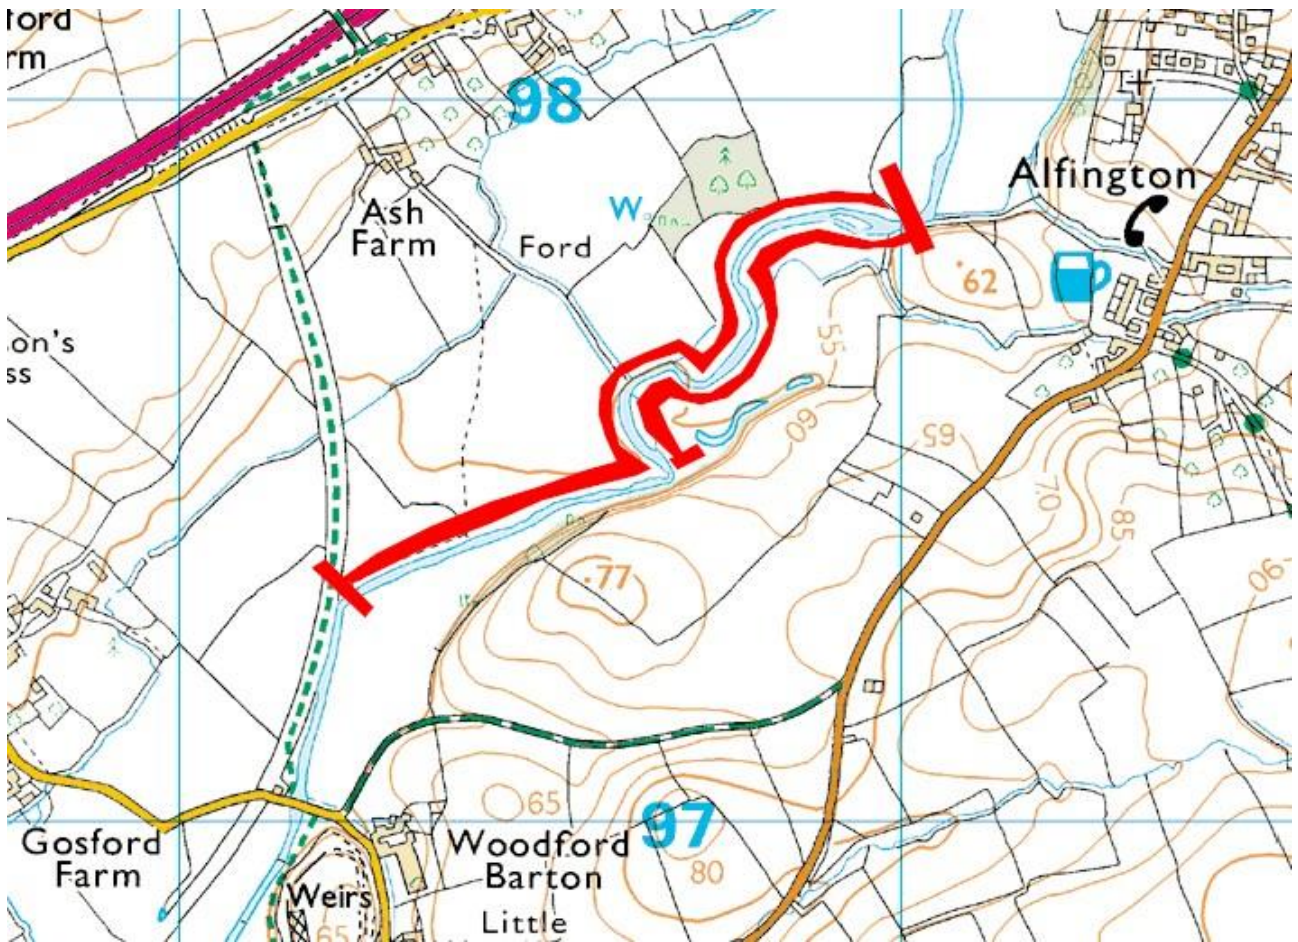

### Honiton (Tracey)
